ddddddanielm@gmail.com

EDUCATION

Universidad Autónoma
Metropolitana

2022 - 2027 (Expected)

B.A. in Economics

Area of Concentration: Applied Economics

PROJECTS

Government Transfers and Youth Labor Supply in Mexico

Stata | ENOE Microdata | IPWRA

Built and validated a reproducible ENOE dataset by merging three survey modules (SDEMT, COE1, COE2), auditing individual-level keys, and constructing an analytical sample of 21,691 students aged 15–18.

Estimated the Average Treatment Effect on the Treated (ATET) using inverse-probability-weighted regression adjustment (IPWRA), with survey weights, covariate adjustment, overlap diagnostics, and robustness checks.

Found that government support was associated with 0.57 fewer weekly work hours ($p = 0.006$), with no statistically significant change in employment probability; estimated effects were concentrated among 18-year-old students.

SELECTED PROGRAMS

Banco de México

Asignatura Banco de México – Selected Student

Aug 2026 – Dec 2026

Selected by Universidad Autónoma Metropolitana to participate in an academic program taught in collaboration with Banco de México.

Currently studying monetary policy, central banking, inflation, financial markets, and the Mexican economy.

The University of Tokyo – Matsuo-Iwasawa Laboratory

GCI World 2026

Sep 2026 – Dec 2026

Currently completing a data science program covering Python, data analysis, machine learning, and business applications of data.

SKILLS

Technical

Excel, SQL, Stata

Econometrics - Statistics

Regression Analysis, Statistical Inference, Treatment Effects, Microeconometrics
